Heavy Duty Folding Pallet Cages with Forklift Guards						
FCP18	1000 x 1200	900mm	750mm	1500kg	4 High	80kg

➤ This is a cost effective folding pallet cage which can be used for a multitude of tasks. The folding pallet cages are made from steel bar and resistance welded at each intersection to make a very strong structure. To use, simply fold up the sides and back to form the pallet cage structure and then the front folds up and is held in place with sliding bolts.

➤ Once assembled, the units can then be stacked up to 4 high for maximum warehouse space efficiency. The folding pallet cages can be folded flat once used to again save space especially on return vehicle journeys.
