- This is large sheet metal Jumbo Tipping Skips which is designed to facilitate the collection and disposal of waste and scrap. These tipping skips are particularly suitable for the collection, handling and tipping of bulky waste like cardboard, plastic wood and polystyrene.
- The tipping skips can easily be tipped from the forklift truck just by moving a lever, however for the larger models we recommend the application of our optional hydraulic cylinder which ensures better control during the tipping process.
- The tipping skips can easily be moved by hand thanks to the four large diameter nylon wheels with roller bearings, in a two fixed and two swivel configuration.
- All skips come with CE marking plate as standard.
- The tipping skips are powder coated and come in a choice of 3 standard RAL colours so that they can be colour coded for specific waste types if required, you can select the colour from within the options. Alternatively a galvanised finish is available.
