- These low height tipping skips are designed to facilitate the collection and disposal of waste and scrap and can easily be tipped from the forklift truck just by moving a lever. This allows scraps and waste to be easily, automatically and safely dumped, minimizing working time and eliminating the risk of injury.
- Equipped with watertight tanks the tipping skips can easily be moved by hand thanks to the four large diameter wheels, two fixed and two swivel, mounted on bearings.
- All skips come with CE marking plate as standard.
- The skips in stock are blue however the skips come in a range of standard RAL colours so that they can be colour coded for specific waste types if required. Alternatively a galvanised finish is available.
