Specification	
Volume - Litres	1000 Litres
Capacity	1000kg
Skip Length	1650mm
Skip Width	1190mm
Skip Height	1075mm

- This is a sturdy, watertight, tilting skip manufactured from high density polyethylene suitable for the transport of particular waste and scrap. The forklift jackets and the bucket support base are constructed of sheet steel metal for strength.
- The tilting skips are equipped with a release and tilting mechanism, connected to a rope that allows the skip contents to be dumped directly from the forklift truck.
- The skip is equipped with 2 fixed castors and 2 swivel castors with brakes and is fitted with a gas charged shock, with a steel "end-stop" mechanism. This ensures a controlled and gradual tilting to prevent damage to the bucket during the tilting phase.
- The container is sturdy, easy to handle, hygienic, quick to clean and suitable for use within the food industry.
- The skip is also available without the tilting device to be used as a handy container on wheels.
