Handrail Height	1000mm
Platform Load Capacity - Standard wheels	800kg
All other sizes can be custom made, please contact us with your requirement.	

- This is mobile access platform model R8 which is designed specifically to enable safe working from the rear of vehicles.
- The platform framework is manufactured from sturdy 50x50x3mm structural box section throughout and the platform deck is formed from 3mm steel chequer plate.
- There is a rung ladder to one side with handrails to allow access onto the platform. Chains are also fitted as standard to the lorry platform across all access openings to offer a form of access control.
- The mobile platform sits on 4 off 125mm dia nylon wheels housed in swivel and brake castors, offering the platform a load capacity of 800kg static loading.
- Each platform has a label clearing showing the Safe Working Load, serial number and date of manufacture.
- The platform is in an acrylic painted finished as standard, Blue RAL 5010. Galvanised finish is available as an optional extra.
